TARGETING LYME

2019 CONFERENCE

Speakers:

Dr. Danielle O'Connor ND also works at the Natural Care clinic. Dr. O'Connor is a Naturopath who treats chronic infection every day in her practice by using genetic predispositions and methylation medicine to pin point how to strengthen their systems for optimal health.

Dr. Christina Carew ND, also works at the Natural Care Clinic and in Toronto. Dr. Carew is a Naturopathic Doctor who sees complex cases from all over the world. Dr. Carew sees mold as a complex problem that can be misdiagnosed, exist or be masked with Lyme Disease.

Sue Faber is a registered nurse (BScN) with a background in ER nursing as well as case management in the community. Sue is the co-founder of Lyme Hope with Jennifer Kravis. Lyme Hope coauthored the Canadian Lyme Petition which now has over 62,500 signatures from across Canada and growing each day these comments are powerful and eye-opening to policy makers, politicians and other influencers as to the lived reality of those who suffer with Lyme disease.
